revitalizing **communities**

THROUGH QUALITY DESIGN

Creating an Identity

AAL's product modularity enables cities to create their own identity and a sense of place. AAL offers limitless design freedom through its range of fixture, arm, pole combinations and custom color capabilities. Banner arms, logos and other signage options also add to a site's authenticity.

Breadth of Product

Whether you're creating a Traditional or Contemporary site theme, AAL offers the complete Family of Fixture package. AAL's Fixture + Arm + Pole + Matching Bollard, can be specified in multiple configurations and elevated scales through the site.

Optical Performance + Safety + Security

AAL's optical systems allow for precise illumination in the environment. The results are better light levels, which provide communities a sense of security when participating in outdoor activities for healthy living. AAL offers Dark-Sky friendly versions for controlling light pollution and glare.

Easy to Install and Easy to Maintain

AAL products are designed for easy installation and routine maintenance. Product features include tool-less access to the lamp and ballast, and pre-wired poles and arms.

AAL offers complete lines of aluminum and concrete bollards to complement your fixture + arm + pole configuration. Bollards can be used for low-level illumination, egress (emergency) lighting, and as pathway barriers for sidewalks and trails to protect pedestrians from vehicular traffic. AAL offers Dark-Sky friendly versions for controlling light pollution and glare.
