## **New Egress Post Top Adapter Provides Integrated Egress Lighting Solution for Existing Pole Applications**

*—Product Stays True to AAL's Reputation of Providing Functional, Aesthetic Lighting Solutions—*

LA MIRADA, CALIF. (July XX, 2007) — Architectural Area Lighting (AAL) introduces the Egress Post Top Adapter (Egress PTA), the first accessory ever produced that can be integrated into an existing non-egress-fitted pole application to provide code-required egress illumination.

The low-voltage reflector-lamp-equipped Egress PTA provides a simple solution for a low power option to provide a tool to help an installation meet the code-driven requirement of providing a one-foot candle minimum illumination along the path of egress to the common way. The installation produces minimal visual change to the pole, thus allowing it to keep its design integrity and architectural relevance.

The Egress PTA is available in two styles — traditional and contemporary — and 13 standard colors. The traditional style is 12 inches-tall, while the contemporary Egress PTA stands 14.5 inches. After being fitted to the pole, each style adapter only adds 3.63 inches to the pole's height.

The product seamlessly slips over four-inch poles and features 360-degree rotation for easy field adjustments. The Egress PTA also includes an adjustable bracket that can be positioned between 15-45 degrees, so concise, direct illumination can be provided on the path of egress.

The Egress PTA features a low voltage halogen lamp with a standard source 12V 50W MR16. The product is wired to an auxiliary power source that activates the lower-wattage MR16 in the event of an emergency or power interruption. The Egress PTA is the first remote emergency head designed for a pole-top outdoor application.

Architectural Area Lighting (AAL), headquartered in La Mirada, Calif., is a leading provider of architectural outdoor fixtures for the commercial, municipal and institutional building markets. AAL products are designed and manufactured to meet both the elegant aesthetic and superior performance needs of its audiences. Featuring a broad range of decorative outdoor luminaires, in both contemporary as well as traditional styles, the company's assortment of lighting products can be specified and installed for use in mixed-use retail, commercial and educational applications; as well as municipal and downtown renovations, and residential developments. Architectural Area Lighting is one of the brands of the Hubbell Lighting family. For additional information visit [www.aal.net](http://www.aal.net).
